

Implementation made easy

Through a simple and stepwise process, requiring only minimal involvement from a project lead within your organization, **we implement, you save time and money.**

1 ASSESSMENT

Obtain instrument tray use data and observe surgical process

2 KICK OFF

Present recommendations and project plan

3 BUILD

Capture procedure sequencing for instrument streamlining and create digital preference cards for education

5 SUPPORT

Ensure optimization, provide technical support as needed and audit streamlining

4 LAUNCH

Present cost saving benefits from streamlining and train users on preference card education resources
